The Indian government launched a new scheme named, 'Khelo India' by combining some old schemes and some new objectives. The scheme was launched with the objective of creating a larger popular platform and to establish excellence in sports. The scheme has 12 basic aspects. Two major aspects among them are to create interest about sports among students from early days in school and to increase girls' participation in sports.

The 'National Sports Development Fund' was established for the development of sports. A donation to this fund is eligible for 100% exemption from income tax. The 'Rajiv Gandhi Khelratna' award was announced with an intention of encouraging players. This award consists of Rs.7,50,000, for excellent performance in the previous year of announcement of the award. It was given to the captain of Indian cricket team, Virat Kohli and Saikhom Mirabai Chanu for weightlifting in 2018. Apart from this, there are other awards like 'Arjun Award', 'Dhyanchand Lifetime Achievement Award', 'Dronacharya Award', 'Maulana

#### Directions: Read the passage carefully and answer the following questions. (Qs 103 - 108)

The State is usually described as 'society politically organized'. Society is an association of human beings, who live a collective life and form social relations to fulfil their needs of life. These may be physical, emotional, intellectual or spiritual. The presence of the societal institutions like family, clans, tribes, villages, religious institutions, educational institutions, work place associations etc. in a society is a fact, which cannot be denied. Society is the whole web of social relationship based on kinship, affinity, language affinity, religious affinity, common conscience of individuals and territorial affinity. Social relationships are governed by necessity, custom, courtesy, morality, mutual understanding, agreement or even contract. When a society is governed by common set of laws, rules, regulations, and obey a supreme authority, it qualifies for being a State. The State fulfils the need of political organization of society to realize the purpose of collective living. This is what we understand from the famous phrases used by Aristotle (384-322 BCE) in his treatise Politics, where he observed that 'Man is a social animal; Man is a political animal'. Thus, the State is formed out of society. The society is the primary association. A State is formed to regulate the political activity of individuals for social order. The State depends on society for its existence, and not vice versa. R.M. MacIver (1882-1970) in his famous work 'The Modern State' has thus observed, 'There are social forms like the family or church or the club, which owe neither their origin nor their inspiration to the state; and social forces, like custom or competition, which the state may protect or modify, but certainly does not create; and social motives like friendship or jealousy, which establishes relationships too intimate and personal to be controlled by the great engine of the state. The State in a word regulates the outstanding external relationships of men in society'.

103. From the given options, select the one which correct according to the passage.

The term "affinity" means:

(A) profanity

(B) affluence

(C) similarity

(D) affirmation

104. As per the passage, what a State cannot create?

(A) infrastructure

(B) political organization

(C) regulations

(D) personal relationships

105. According to the passage, what is the purpose of forming a State?

(A) To create interpersonal relations

(B) Fulfill religious customs of the society

(C) Fulfill political organization of society

(D) To create social forms like religious institutions
